All-in-one Gateway   Smart Wireless Networking   Strong Control of Network Traffic Flow

Series Overview

EAC Series Wireless Access Controller (AC) is well designed and positioned for SME network. It features gateway and AC function integration, reducing the number of devices and TCO in network. It comes with the standard granular user control management, comprehensive RF resource management, 24/7 wireless security control, fast roaming, strong QoS. When paired with EAP Series Access Point (AP), it serves as an ideal access control solution for WLAN access of SMB network.

Functions

Minimal WEB
Designed with a minimalist graphical WEB, easy to operate, which improves configuration efficiency.

Strong Control of Network Traffic Flow
Limits the uplink and downlink bandwidth, and the speed of users, meeting the needs of network management.

Robust Design
Built to last, the architecture of the switch makes it highly reliable, operating with high-efficiency non-stop.
